# CUSTOMIZED HEALTH SCREENING SERVICE

Your All-in-One Gateway to Premium Healthcare in China.

For frequent international travelers, navigating an unfamiliar medical system—especially with language barriers—can feel overwhelming. Tight schedules and constant business commitments often leave little room to take care of your health.

We understand that as global business professionals or returning overseas residents, your time is valuable and your expectations for medical quality are high. The sense of inconvenience and detachment in an unfamiliar healthcare environment is exactly the pain point we aim to solve.

Now, it is time to leave those concerns behind and embark on a refined, efficient, and personalized health journey.

Our dedicated consultants collaborate directly with medical specialists to curate a fully customized screening program tailored to your needs (including advanced clinical examinations). We also provide flexible payment options and seamless scheduling to ensure your medical visit is efficient, precise, and focused solely on your health.

## WHY CHOOSE US?

At Mediversity, we integrate rigorous clinical standards throughout the entire health-management process. Rather than offering one-time, templated checkups, we provide a comprehensive, long-term health solution—from precise screening to continuous care—built on highly personalized examination plans.

### Truly Customized Screening Programs

Based on your age, medical history, family history, we design a personalized screening package. Every examination is chosen with clinical precision to meet your specific needs.

### Bilingual Reports & Optional Medical Support

We provide internationally standardized dual-language medical reports so that foreign physicians can accurately understand your health status.

### Premium Exams in Tier-A Hospitals

Gain direct, efficient access to Shanghai's premier medical institutions, renowned for their advanced technology and expertise, bypassing long waiting times.

### Seamless, Worry-Free Service Experience

From inquiry to completion, your service concierge accompanies you throughout the entire process, ensuring a smooth, reassuring medical journey.

## OUR MEDICAL PARTNERS

### INTERNATIONAL MEDICAL CENTER, RENJI HOSPITAL AFFILIATED TO SHANGHAI JIAO TONG UNIVERSITY SCHOOL OF MEDICINE

**RENJI HOSPITAL**  
SHANGHAI JIAOTONG UNIVERSITY  
SCHOOL OF MEDICINE

The center offers high-quality, internationally aligned medical services, backed by Renji Hospital's 180-year history and its top specialties such as hepatobiliary surgery, reproductive medicine, gastroenterology, and rheumatology.

### SHANGHAI GUANG-CI MEMORIAL HOSPITAL

**廣慈紀念醫院**  
GUANG-CI MEMORIAL HOSPITAL

Established in 1992 with academic support from Ruijin Hospital, Guangci is among Shanghai's first foreign-oriented medical institutions. It serves domestic and international clients with one-stop health management services covering wellness, clinical care, anti-aging, and rehabilitation.

We choose to collaborate with top Tier-A Tertiary Hospitals to ensure that every step of your health examination is conducted within a rigorous clinical medical system. Unlike ordinary checkup processes, each of your examinations follows strict clinical pathways, and every result undergoes multiple rounds of verification to ensure that its accuracy meets the standards required for clinical diagnosis.

This fundamentally reduces the risk of misinterpretation and ensures that your health report is not only comprehensive, but also carries strong and reliable clinical reference value.

## YOUTH BASIC SCREENING PACKAGE

This package is tailored for elite youth and is the preferred choice for establishing a personal health baseline. We fully understand that studying abroad involves adapting to a new environment and a potentially less accessible healthcare system. An authoritative, internationally recognized health assessment before departure helps you embark on your overseas studies with peace of mind. This is not merely a check-up; it is a primary health investment before you go abroad.

### PACKAGE INCLUDE

- **Basic Physiological Indicators:**
  - Height, weight, body fat, blood pressure, heart rate, and general physical examination.
- **Laboratory Tests:**
  - Complete Blood Count (CBC);
  - Liver function, kidney function, fasting blood glucose, lipid profile (four items);
  - Thyroid function (three items).
- **Imaging Tests:**
  - Low-dose Chest CT (plain scan);
  - Abdominal Ultrasound (liver, gallbladder, pancreas, spleen, kidneys);
  - 12-lead Electrocardiogram (ECG).
- **Early Tumor Screening:**
  - Carcinoembryonic Antigen (CEA), Alpha-fetoprotein (AFP), and other basic tumor markers (total five items).

## SERVICE FEATURES

- ✓ **Professional Quality Assurance:** Leveraging the top-tier hospital medical system ensures the accuracy and authority of test results, with strong international recognition of reports.
- ✓ **Precise Targeted Screening:** Scientifically designed items address potential health risks specific to young adults, avoiding unnecessary tests and saving valuable time before departure.
- ✓ **Health Security:** Gain a comprehensive understanding of your health status before departure. Carry an authoritative bilingual (Chinese-English) report to facilitate clear communication of your medical history to doctors overseas.

## CUSTOMIZED HEALTH CHECK-UP PACKAGES

Based on professional medical evaluation standards, we have designed a series of health screening packages to meet diverse needs, ranging from foundational assessment to in-depth evaluation. Whether you need to establish a personal health baseline, undergo a systematic deep screening, or seek a comprehensive assessment encompassing functional and immune dimensions, you can find a precise option tailored to your requirements.

### Premium Package

This is our most exhaustive body assessment, evaluating everything from immune function to the nervous system. It is the ultimate choice for resolving complex health concerns or establishing a sophisticated, long-term health strategy.

### In-Depth Package

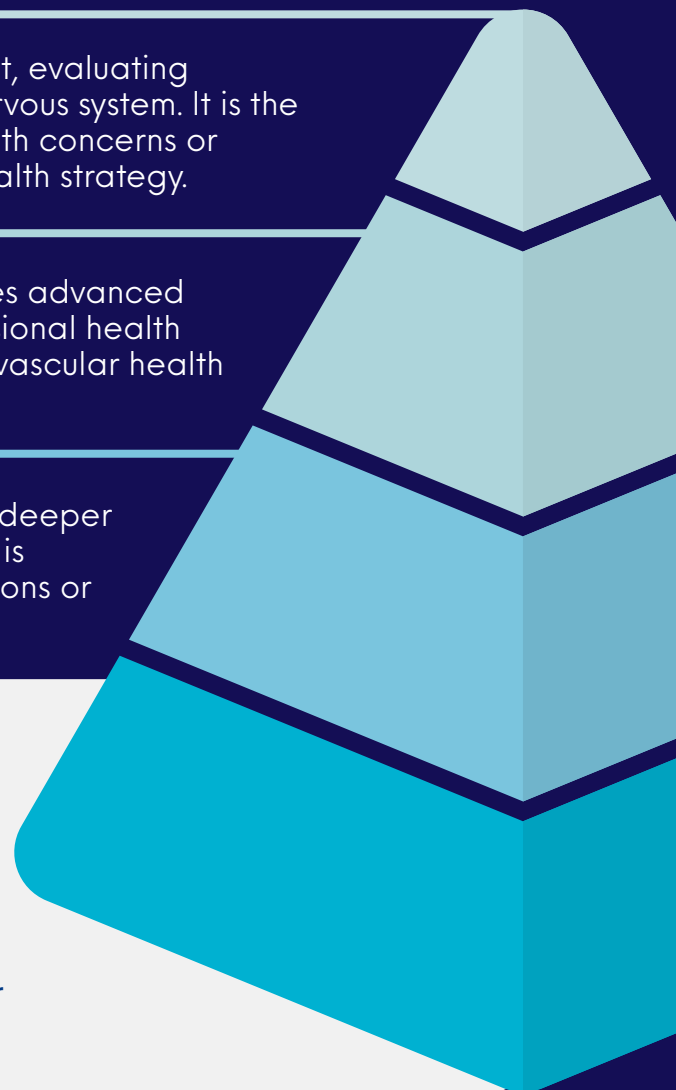

For a thorough "body inventory," this package uses advanced imaging and in-depth lab tests for a multi-dimensional health evaluation. It is ideal for those focusing on cardiovascular health or with a family history of disease.

### Essential Package

Going beyond basic check-ups, this package offers deeper insights into organ function and early disease risks. It is perfectly suited for comprehensive annual examinations or addressing specific health questions.

#### ALL PACKAGES INCLUDE:

Core physiological indicators, major organ function, and common disease risk screening. This includes comprehensive blood and body fluid analysis, important imaging studies such as abdominal ultrasound and ECG, and covers basic tumor markers and *Helicobacter pylori* detection.
